Wood Colour Card

PPG WOOD FINISHES

PPG Industrial Coatings offers to door and window joinery producers transparent coatings systems for comprehensive protection and decoration.

We enrich our products with durable, colorful, eye catching appearance.

PPG Wood Finishes top quality coatings preserve natural and structural properties of wooden window frames and doors, emphasizing the beauty of the timber and accentuating aesthetic values such as the color and the shape.

Translucent Colors

Inspiring, our translucent colors give an extra dimension to wood. The color of transparent paint in the right film thickness is strongly influenced by the type of wood which is used. This collection gives an overview on the most wanted colors in translucent colors and are an indication of the final color. Our advice is to apply the paint with the right film thickness on the desired type of wood for a definitive assessment of the color. Of course is PPG Industrial Coatings able to tint other colors too.

Wood care and renovation

In order to maintain the natural beauty of the wood for a long time, it needs to be protected against damaging exposure to external factors by means of optimally selected an professional products.

PPG Woodcare milk has been developed specially for the PPG Wood Finishes coating systems for optimum protection against weather effects and thus contribute towards extending the renovation intervals.

The Wood Finishes products of PPG Industrial Coatings are used in an industrial environment but are also easy to combine with the maintenance products of PPG Architectural Coatings.

Commitment to Sustainability

Manufacturers are looking for solutions that enhance production efficiency while remaining eco-friendly. PPG Industrial Coatings are available in environmentally friendly formulations designed to exceed global and regional environmental requirements. PPG offers industrial coatings that allow customers to reduce their hazardous air pollutant emissions and is committed to continually developing products which meet specific applications. PPG Industrial Coatings manufactures environmentally responsible products that use less energy and utilize better application processes.
